

We at Robbins Auto Top have been doing business with Quality Thread for many years, and have found their products to be just as their name states, 'Quality'.

The thread we purchase is high-strength solution-dyed polyester, created specifically for our use. It is used on convertible tops, something that is exposed to direct sunlight, yet it retains its original color, thanks to the UV protection inside the thread. It is coated for easy sewing, but never over-coated to render it unusable. The strength of the thread is superior, as it does not fray during use – or afterwards. We have never had any complaints from our customers, only good comments regarding the color shades and the fact that the color lasts longer than any other thread on the market today.

Regarding Quality Thread as a company, all of their employees go above and beyond the call of duty when it comes to working with us. Everyone is always polite and attentive, and take an interest in our company. They return calls and e-mails right away, never keeping us waiting. They have come up with alternative shipping solutions that are practical AND cost-effective for both of our companies. They are a pleasure to do business with, and we look forward to many more decades of continued service.

From all of us at Robbins Auto Top Company Inc., we would like to thank Bob Flacks and his entire team for a job well done!
